Positivity: Creating The Success You Want In Your Professional & Personal Life

Perception can quickly become reality. Quantum physics confirms that like energies attract, reminding us that Positivity is the only option!

In this session, Julia works with attendees to guide them in recognizing how appearance, attitude, actions and verbal and physical communication all play vital roles in how successful or NOT successful we choose to become in life.

Using personal examples of both positive and negative outcomes and role play scenarios, Julia engages members with examples of how adopting a positive approach in all interactions can make or break the success we seek.

YES - the success we encounter is a CHOICE - NOT something that develops from the outside.

Life is Short - Live It/Risk It!

Having covered life and death moments in her broadcast career and watched as several lives were snuffed out right before her eyes, Julia knows and understands the true meaning of “Life is Short.” She knows that at any moment one incident can change our lives forever! Julia has learned it’s not enough to just DREAM or TALK about our desires and aspirations for achievement in our lives. It takes finding the courage to actively put into motion changes which put us closer to living our dreams.

In this Keynote, Julia shares personal experiences, pivotal conversations and observations along this life journey, to give attendees food for thought for living to the fullest - NOW! Julia offers actionable steps for embracing each treasured moment we are given.

At the conclusion of “Life is Short” attendees will be able to;

- * identify their burning-desire for achievement
- * arm themselves with a practical tool kit to begin the journey to help them reach their destinations.
